

## Benefits of the PreSage Visual Traffic Signal System

- Reduce traffic accidents at blind curves and blind intersections
- Animated display clearly makes drivers aware of approaching cross traffic
- Reduce traffic congestion and road accidents
- Accidents can be recorded by video camera and analyzed

**PreSage Visual Traffic Signal System is your solution for mitigating everyday traffic problems**

## Vehicle Intersection Alert (VIA) System

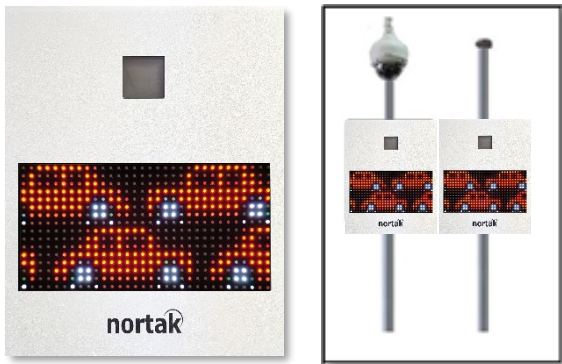

Safer blind intersections and blind curves with animated traffic signs.

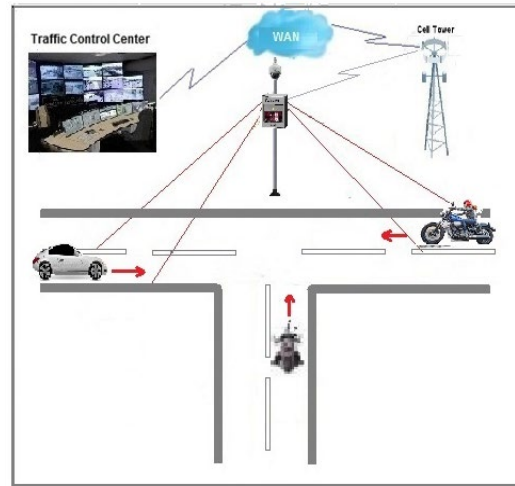

Vehicle Intersection Alert (VIA) System detects approaching vehicles. Flashing sign alerts drivers that another vehicle is approaching the intersection

Animated sign – no misunderstanding or confusion

## Vehicle Intersection Alert (VIA) System T-Intersection

## BeWare of Bicycle (BWB) System

BeWare of Bicycle system was developed to mitigate the potential of cyclists or pedestrians being struck by a vehicle with a flashing display at driver's eye level to indicate the presence of a bicycle or pedestrian.

Drivers are alerted to the presence of a bicycle because the sign is at driver's eye level

AI system can detect a stopped bicycle as well as a moving approaching bicycle.
